Alkis Gkogkas

Marketing Data & CRM Analyst

LONDON UK ♀
alkis.gkogkas@gmail.com
http://www.linkedin.com/in/alkis-gkogkas

Analytical CRM and Marketing Data professional with experience bridging CRM, Data and Engineering teams to improve reporting, customer journey analysis and decision-making. Skilled in SQL, Tableau, automation and working across multi-source datasets to uncover insights and improve performance. Hands-on experience with funnel analysis, stakeholder-facing dashboards, CRM data structures, custom attributes and event logic, alongside a strong background in A/B testing, with a focus on data quality, operational efficiency and translating technical detail into actionable recommendations.

Areas of Expertise

SQL & Automation	Tableau & Stakeholder Reporting	Multi-source Data Analysis
Funnel & Conversion Analysis	Segmentation & Audience Logic	AI for Analytics
A/B Testing & Experimentation	Data Quality & Event Validation	CRM & Customer Data

Accomplishments

- Created automated reporting and dashboards across SQL, Tableau and Google Sheets, improving visibility of key CRM and conversion metrics while reducing manual reporting effort.
- Built conversion-focused reporting to track customer progression through key funnel stages, including profile completion, lead-to-free conversion and free-to-paid upgrades across different plans.
- Owned the audit of custom CRM attributes and events, improving documentation, structure and overall data hygiene to create a cleaner foundation for reporting and future development.

Career Experience

SQL Analyst, Checkatrade **Dec 2025 – Present**

Acted as a bridge between CRM, Data and Engineering teams, supporting analysis and decision-making across both Trade and Consumer CRM activity. Developed reporting and automated Tableau dashboards to track key Trade customer journeys, including profile completion, lead-to-free conversion and free-to-paid upgrades, helping identify opportunities for optimisation. Built stakeholder-facing Consumer CRM reporting in Google Sheets and used SQL, APIs and automation to improve access to insights and reduce manual reporting effort.

Built and refined audience segments in Braze, supported Catalogs, Braze Canvases and Liquid logic, and owned the audit of custom CRM attributes and events, improving documentation, structure and data hygiene. Used AI tools including Claude Code, Gemini and ChatGPT to accelerate analysis, scripting, automation and workflow improvement.

CRM Operations Manager, Rugby Football Union **Sep 2022 – Feb 2025**

Led Customer Lifecycle Management (CLM) initiatives by creating highly personalised, automated campaigns across email platforms. Owned complex segmentation and dynamic content strategies, leveraging multiple data sources across three audience levels and four GDPR consent brands to improve Loyalty/Retention and maximise Customer Lifetime Value (LTV).

Assisted in the migration of the Customer Data Platforms and CRM systems from Unica, Acoustic and Tableau, to the Salesforce package of Marketing Cloud, Data Cloud and Intelligence focusing on data segments, data validation and comparison of audiences across platforms along with the intended personalised fields.

Additionally validated data feeds using Postgres SQL in Dbeaver and flagged discrepancies.

Campaign Manager , Genpact, London **Jul 2021– Jul 2022**

Created and operated campaigns for a large global financial services client, utilising channels such as On-site advertisement, Email and Push Notifications. Using A/B testing, champion/challenger, audience segmentation, control groups, incentive driven retention strategies and calls to action designed to reduce churn and improve retention

Senior Campaign Consultant, Merkle, London **Jan 2019– June 2021**

Developed marketing data and financial services models using numerous mediums including Email, SMS, Direct mail and Phone. Leveraged in-depth knowledge and implemented rigorous Quality Assurance Checks for campaigns, fulfilling and surpassing industry standards. Efficiently measured the success of the campaign by assessing the customer actions. Implemented best practices and recommended strategies for campaign optimisation by collecting data and interpreting into acumen. Effectively coached the co-workers regarding data reporting and utilising the database to enhance the overall performance.

- Developed campaign maturity reports template by responding to the questions and utilising the gathered information.

- Integrated campaigns process and briefs by deploying an effective automated engagement reporting system.
- Conducted in-depth review regarding the productivity of different marketing campaigns post-completion and impact on the targeted audience.
